Easy for you

Clever solutions that help you shine

Our Experience Tech Tools, Unitron TrueFit™ fitting software, and Remote Plus app help you deliver personalised care across the Smile portfolio—and now, they're better than ever.

Improvements to our Experience Tech Tools

Log It All

Gain deep insights into how clients engage with the world around them, empowering you to make more personalised recommendations that enrich every moment—and amplify their daily lives. Improvements to Log It All make it even easier to support counselling conversations and technology level selection.

Ratings

Enhancements to Ratings let clients provide more in-the-moment feedback through the Remote Plus app. In addition to capturing their hearing instrument settings, Ratings captures information about their listening situation, supporting more efficient and personalised counselling.

Deliver a truly personalised hearing experience and bring joy to your clients every day.

Unitron makes life vibrant with amazing hearing solutions designed to make the experience easy. Because everyone deserves to **Love the experience.**™

Smile with ease

A Sonova brand

Love the experience™

The Smile platform from Unitron helps you bring your clients clever solutions that enhance their hearing journey, allowing them to delight in what life has to offer—while giving you the tools and confidence to deliver exceptional care at every step.

Easy to hear

Give your clients a hearing experience that transforms not just how they hear, but how they live. With advanced sound performance and Universal Connectivity, Smile delivers an uplifting, everyday listening experience.

Brilliant sound performance

Smile is the platform designed to help clients feel it all, from ear to ear.

At the heart of Smile is the ERA™ chip, delivering a powerful combination of performance and stability.

The platform adapts to a range of listening environments, seamlessly adjusting sound to match life's changing moments—from calm and quiet to noisy and complex.

Speech Enhancement with Soft Speech supports better understanding in quieter moments, reducing listening effort and fatigue.[1]

Enhanced speech-from-noise separation, powered by DNN technology, helps clients stay in the conversation when life gets loud and sounds are coming from all directions.

Whether they're navigating the hustle and bustle of a busy café or soaking up the quiet at home, your clients can feel the joy in every chat, laugh or moment.

Universal Connectivity[2]

Smile delivers Universal Connectivity thanks to the ERA chip.

It's equipped with updated Bluetooth®, making it easier than ever for clients to stay connected to their favourite devices. Products on the Smile platform can maintain simultaneous connections with two devices and support pairing with up to 8 devices.

With impressive range and seamless, instant switching between acoustic and streamed signals, hands-free calls with loved ones sound more vibrant.

Clients have more flexibility, with the freedom to walk away from their phones and multi-task while staying connected thanks to up to 6x more wireless transmission power.

1 Reference: Latzel, M., Heeren, J., and Lesimple, C.(2024).
2 Universal Connectivity not available for the Insera S 10 NW O.
The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of each marks by Sonova AG is under license.

DNN

Moxi S-RX (NEW)

Enhanced speech-from-noise separation, powered by DNN technology, helps clients stay in the conversation, even in the loudest settings—and even when sounds are coming from every direction.

Easy to wear

Always ready for what each moment brings. Your clients deserve great sound and a great fit, and Moxi™ S-RX, Moxi S-R, and Insera™ S-R hearing instruments deliver.

From sleek, behind-the-ear styles to discreet, custom in-the-ear options, the Smile portfolio offers flexibility to suit every lifestyle. Designed to keep up with the day, these hearing instruments deliver dependable performance with lasting comfort.

With water-resistant housing, IP68-rated protection against dust and moisture, and EasyGuard™ domes wax protection[3], Smile hearing instruments offer proven reliability you can trust.

Moxi S-R

A sleek, rechargeable style that fits comfortably behind the ear, built for all-day wear and effortless connection—at home or on the go.

Insera S-R

A discreet, custom, in-the-ear style that's made for each client, with rechargeable power and reliable connectivity.[4]

Charging is easy

ChargerGo for Moxi S-RX and Moxi S-R, and Charger ITE for Insera S-R make powering up stress-free.[5]
