Beltone Serene Custom Rechargeables

Beltone Serene™ Custom Hearing Aids

Beltone Serene custom hearing aids are available in three discreet styles molded to fit the unique shape of your ear and designed to blend seamlessly into your daily life. Choose from a range of inclusive colors you can match to your skin tone, hair color, or personal taste. Plus, because these custom hearing aids are weatherproof and sweatproof, they're suitable for any lifestyle and are always ready to take on the day with you.

Beltone Serene Custom Rechargeables

These rechargeable hearing aids are designed to look like earbuds for a discreet and comfortable fit you can wear anywhere, from the gym and work to date night. They provide all-day power on a single charge, making them the perfect choice for any lifestyle, as well as for hands-free calls.

Beltone Serene In-the-Canal (ITC)

Our smallest ITC hearing aid yet provides great wireless connectivity for streaming your favorite music, audio books, podcasts, and more from smartphones and accessories. These discreet hearing aids use traditional batteries and provide a comfortable hearing experience, whether you're attending a big event or enjoying a meal out with family and friends.

Beltone Serene Completely-in-Canal (CIC)

The barely-there design of our smallest hearing aid can make it look as if you aren't wearing hearing aids at all. If you prefer a quick and easy, hands-off experience or live your life on the go, these hearing aids will keep things simple. Whether you're boating, golfing, or enjoying a cup of coffee on the patio, our completely-in-canal design naturally protects from wind noise—so you can hear what matters.
