

OTICON | **More**

More than

meets the ear.

More clarity. More hearing. More life.

oticon
life-changing technology

A man and a woman are walking along a cobblestone promenade by the water. The woman is wearing a black dress and a light-colored jacket, and the man is wearing a dark suit. They are both smiling and looking at each other. The background shows a city skyline with various buildings and a church spire. The sky is blue with some clouds. There are several small blue frames containing different icons: a person on a bicycle, a person walking, a dog, a person on a scooter, a person on a motorcycle, a person on a boat, a person on a car, a person on a plane, a person on a train, a person on a bus, a person on a tram, a person on a subway, a person on a train, a person on a bus, a person on a tram, a person on a subway. The text "It's time to get more out of life" is written in a bold, sans-serif font on the left side of the image.

At Oticon, we focus on understanding the brain and develop technology that supports it. New research tells us that the brain can handle access to more information from sounds.* Having a hearing aid that supports your brain, by delivering sounds in a precise and clear way, is all the more important.

The sounds around you are constantly changing in unpredictable ways - everywhere you go. And those sounds contain far more richness than just speech. Your brain recognizes all of this complexity and creates meaning from it.

* O'Sullivan, et al (2019). Puvvada, K. C., & Simon, J. Z. (2017).

OTICON | More

Hear the sounds that shouldn't be missed

Designed to support your brain

The human brain is the gold standard for processing sound. So we developed Oticon More to work more like how the brain works because it learned through experience. This means Oticon More supports your brain by giving it more of what it needs to make better sense of sound.

More than meets the ear

Oticon More gives your brain the clearest sound information, allowing you to hear sounds that shouldn't be missed. You benefit with improved speech understanding with less listening effort and the ability to remember more.

Powered by a Deep Neural Network

Oticon More is the world's first hearing aid with a Deep Neural Network (DNN) embedded on the chip. The DNN is a technology we have trained with 12 million real-life sounds. This built-in intelligence ensures each individual sound is delivered with detail and clarity.

Hear more
with less effort

Oticon More delivers

30%
more sound to
the brain*

15%
increase in speech
understanding*

compared to industry-leading Oticon Opn S™.

Next-generation connectivity to smartphones

With Oticon More you can enjoy high-quality sound streaming from your favorite devices.

Direct streaming from iPhone® and Android™ devices*

Made for

iPhone | iPad | iPod

Works with

android

A wide range of connectivity options

ConnectClip

Use ConnectClip as a discreet microphone accessory that wirelessly connects to your Bluetooth devices.

TV Adapter

Use TV Adapter to stream sound from the TV directly to Oticon More hearing aids.

Remote Control

Adjust volume, switch programs, or mute the hearing aids with the touch of a button.

The Oticon ON app - Control at your fingertips

Oticon ON app lets you personalize your listening experience when connected to your device. You can adjust the volume, change the program, check the battery level, and control other Oticon devices. It even comes with a "Find my hearing aids" feature.

More connections
More conversations
More life

A full day's power. Every day.

The rechargeable Oticon More comes with a stylish charger that takes just three hours to give you a full day of battery life* - including if you stream sound from other devices.

- No disposable batteries means less hassle and less waste
- Quick recharge of 30 minutes gives an additional six hours of power
- Convenient, easy-to-use, and reliable

*Lithium-ion battery behavior varies depending on hearing loss, lifestyle, and streaming behavior.
