

People with hearing loss are at the heart of everything we do because we know they're placing their trust in us. This is why we've not stopped pioneering innovative new technologies, with consistent quality, for over 150 years to help them feel more involved, connected and in control, transforming their lives through the power of sound. Available exclusively through audiologists and hearing care professionals.

ReSound is part of the GN Group – pioneering great sound from world-leading ReSound hearing aids to Jabra office headsets and sports headphones. Founded in 1869, employing over 5,000 people, and listed on NASDAQ OMX Copenhagen, GN makes life sound better.

So much more than just powerful

ReSound GN

ReSound ENZO Q™

The complete hearing solution for severe-to-profound hearing loss

ReSound ENZO Q - beyond powerful

Confidence starts with a reliable, hassle free hearing experience where sounds are clear and comfortable all around you.

ReSound ENZO Q, our new Premium-Plus hearing aid for severe to-profound hearing loss, goes beyond powerful to provide a complete hearing solution. Imagine walking in the city, crossing a road in traffic, streaming audio, taking

a call on the go, chatting in a busy cafe or at a club – and hearing crystal clear, high-quality sound. You can enjoy the atmosphere and hear the detail in the conversation and musical tones. Even uncomfortable loud sounds become comfortable. With the complete picture you can realise your full potential – supported by remote and real time care where and when you need it.

**CRYSTAL CLEAR, COMFORTABLE,
HIGH-QUALITY SOUND**

**EVEN GREATER CONNECTIVITY
AND DIRECT STREAMING**

**FULLY PERSONALISABLE TO
SUIT YOUR PREFERENCES**

**CONVENIENT REMOTE
AND REAL TIME SUPPORT**

**PERFECTLY COMPLEMENTS
COCHLEAR™ IMPLANTS**

Crystal clear, comfortable, high-quality sound

Severe-to-profound hearing loss requires a complete hearing solution that is so much more than just powerful. ReSound ENZO Q is created with the most advanced technology yet so you can enjoy clear and comfortable sound, extensive connectivity options, and a 20% longer-lasting battery compared to ReSound ENZO 3D™.

EXPERIENCE THE POWER OF CLARITY

Clarity of sounds is highly important.

Personalise your hearing experience to suit your preferences – and feel comfortable knowing that there won't be whistling or squealing noises even when your hearing aid volume is ramped up.

40%
improvement
in hearing
speech in noise

Research shows that people with severe-to-profound hearing loss experience 40% improvement in hearing speech from the side or behind them in noisy conditions with our technology.*

HEARING BETTER IN NOISE

It takes effort and energy trying to hear in noisy places. ReSound ENZO Q cleverly supports the way you like to listen without cutting you off from your surroundings. Follow group conversations and hear where sounds are coming from all around you, while focusing on speech and other sound details.

* With directional microphones compared to omnidirectional microphones.

UNCOMFORTABLE SOUNDS MADE COMFORTABLE

High levels of amplification to feel connected and assured in your surroundings are good. However, unpleasant amplified noises are tiresome.

ReSound ENZO Q strikes the right balance. It detects your environments and automatically adjusts volume and noise settings to just-right levels. Distracting background sounds like running water or the din of traffic become comfortable, yet still audible. Our technology also takes the edge off particularly loud, jarring sounds, such as keys dropped on a table or audience applause.

THE RESOUND DIFFERENCE

It is a privilege to develop hearing aids for people with severe-to-profound hearing loss that you can trust, because we know that hearing aids are an integral part of your life. ReSound ENZO Q has the power – and so much more – to exceed your expectations.

89%
of sudden loud
sounds are more
comfortable

Listeners judged impulse sounds like hammering or bottles clinking against one another as being softer with ReSound hearing aids 89% of the time.

Fully personalisable to suit your preferences

You set the pace with ReSound ENZO Q hearing aids. They automatically adjust to your sound environment, then you can personalise the details of your hearing experience even further with the ReSound Smart 3D™ app, directly from your phone.

The app places real-time control right at your fingertips. Swipe and select a range of programs and optimise sounds, such as speech focus and noise reduction, to suit your current location.

PROGRAM CAROUSEL

Swipe through environment programs: All-Around, Restaurant, Music or Outdoor, to reflect where you are.

SOUND ENHANCER

Use the sliding bar, filters and quick buttons to increase speech focus, reduce noise, and adjust bass, middle and treble.

GEOTAGGING

Save your favourite sound settings. Even geotag the settings to a preferred location so they automatically activate the next time you're there.

FIND MY HEARING AIDS

If you misplace your hearing aids, you can locate their last recorded position on a map.

RELIEF FROM TINNITUS

Easily adjust the level of therapeutic tinnitus relief sounds without altering the volume of your hearing aids via our app.

Even greater connectivity and direct streaming

Stream directly from both iOS and Android™ devices* to your hearing aids and enjoy crystal clear, comfortable, high-quality sound. Talking on the phone, watching TV, or listening to music, it's as simple as using wireless stereo headphones.

* From Android version 10 with Bluetooth ver 5.0 and the Android Streaming to Hearing Aids feature

50%
better speech
understanding
with ReSound

Research shows that when streaming to ReSound hearing aids, users can understand 50% more of the conversation on average, compared to a regular phone call.

TELECOIL

ReSound ENZO Q also has a telecoil, which enables you to connect to loop sound systems. Enjoy amplified sounds delivered directly to your hearing aids in public spaces, such as museums, live venues, lectures or theatres.

Wireless accessories to make life easier

At work or play, ReSound wireless accessories can help you in challenging listening situations, from the TV to noisy backgrounds or bustling group conversations around a table. The accessories work together as an intelligent system and provide a seamless real-time listening experience.

ReSound Multi Mic

Connects with loop and FM systems*. This mic clips onto the clothing of the person you're talking to. You can also place the mic on a table to work as a table microphone for great group conversations.

ReSound Micro Mic

Give this clip-on mic to the person you're talking to and easily keep up with conversations in noisy environments – up to 80 feet (25 metres) away in a clear line of sight.

ReSound TV Streamer 2

Stream sound from the TV directly to your hearing aids. Your volume can be set and adjusted independently of the volume set by any other viewers by using the ReSound Remote Controls.

ReSound Phone Clip+

Clip onto your clothing to make clear phone calls, mute background noise, or stream music or audio from any Bluetooth® enabled phone or smart device.

ReSound Remote Control

Small with large, easy-to-locate buttons, this accessory is ideal for adjusting hearing aid volume and switching between programs quickly and discreetly.

ReSound Remote Control 2

Easily control volume and program settings on your hearing aids, mute sound, and check all your wireless accessory connections and settings at a glance.

* FM receiver required.

Convenient remote and real-time support

ReSound Assist gives you even more options to stay in touch with your hearing care professional and receive help and support that fits your preferences and schedule.

FACE-TO-FACE, ONLINE HEARING CARE WHEREVER

The new ReSound Assist Live* plus the ReSound Smart 3D app make it possible to have face-to-face fitting sessions from anywhere. Use the app to schedule a video call with your hearing care professional to fine-tune your hearing aids remotely.

ADJUSTMENTS ANYWHERE

At home, at work, on vacation, ReSound Assist also lets you send fine-tuning requests to your hearing care professional and receive downloadable updates from them, all via the ReSound Smart 3D app.

You can send a satisfaction rating back to your hearing care professional to let them know how satisfied you are with the new improvements.

Always receive the best hearing care experience with ReSound Assist and ReSound ENZO Q.

* Please ask your hearing care professional for date of availability.

Perfectly complements Cochlear™ implants

Smart Hearing Alliance

People with a cochlear implant on one ear may experience great benefits with a hearing aid fitted on the opposite ear¹⁻⁴. The Cochlear™ implant and the ReSound ENZO Q hearing aid, or other ReSound hearing aids, create a complementary bimodal solution that may improve speech recognition in noise – including locating where sounds are coming from – while providing superior sound quality, among other benefits, compared with using a cochlear implant alone.

CONNECT AND STREAM FOR A FULL BIMODAL EXPERIENCE

ReSound and Cochlear share wireless technology, so you can stream directly to your Cochlear implant and ReSound hearing aid simultaneously from a compatible iOS or Android device, or from a range of wireless accessories*. With more sound to both ears and superior sound quality compared to using a cochlear implant alone⁴, you can take phone calls, enjoy your favourite music or TV series, or chat more easily with someone at a noisy restaurant⁵.

The Smart Hearing Alliance, a unique collaboration between Cochlear and ReSound, makes it easy to provide a bimodal solution for you.

Please seek advice from your health professional about treatments for hearing loss. Outcomes may vary, and your health professional will advise you about the factors which could affect your outcome. Always read the instructions for use. Not all products are available in all countries.

Cochlear, Hear now. And always, Nucleus, Kanso, Baha, the elliptical logo, and marks bearing an ® or ™ symbol, are either trademarks or registered trademarks of Cochlear Limited or Cochlear Bone Anchored Solutions AB (unless otherwise noted).

Stylishly reliable and robust

No matter how active you are, rest assured that ReSound ENZO Q is resilient and robust, and designed to withstand the demands of all users.

Select from two powerful Behind-the-Ear models with a long battery life – a great advantage when streaming – and 10 elegant colours to suit your style.

We know you rely on your hearing aids. Therefore, each ReSound ENZO Q hearing aid is treated with a protective iSolate nanotech coating, which repels water, earwax and debris to protect the delicate electronics.
