

People with hearing loss are at the heart of everything we do. Our award-winning ReSound® Smart Hearing aids help people feel more involved, connected and in control. In an ever-smarter world, we think big and challenge the norm so that we can transform lives through the power of sound. Available exclusively through audiologists and hearing care professionals.

ReSound is part of the GN Group – pioneering great sound from world-leading ReSound hearing aids to Jabra office headsets and sports headphones. Founded in 1869, employing over 5,000 people, and listed on NASDAQ OMX Copenhagen, GN makes life sound better.

ReSound GN

GN Making Life Sound Better

Smart Hearing 

The future is here

Smart Hearing™ will change the way you think about hearing aids. They adapt to you instead of making you adapt to them.

Smart Hearing 

You'll hear more than you ever imagined with ReSound LiNX 3D™. On the beach or on the phone, you can enjoy connecting to the world around you with crystal clear sound.

You can use your ReSound LiNX 3D hearing aids just like wireless stereo headphones. And you'll get a new level of control over your hearing experience – wherever you are.

All of this in a hearing aid that is durable, comfortable and virtually invisible on the ear.

Now you can hear more, do more and be more than you ever thought possible.

In a series that began with the world's first Made for iPhone® hearing aid, ReSound LiNX 3D is the newest Smart Hearing aid from ReSound.

Hear more than you ever thought possible

Imagine talking to your colleagues against a backdrop of chopping knives and sizzling pans. With ReSound LiNX 3D, you can experience more of the environment around you while staying focused on speech.

ReSound LiNX 3D

Because it's up to

50%[†]

better at identifying speech in various environments*, you can:

Hear up to

80%^{††}

more of the sounds around you**

Understand up to

40%^{††}

more speech in noise**

[†] Compared to other premium hearing aids.

^{††} Compared to premium hearing aids with narrow beamforming.

 SURROUND
SOUND
by ReSound

More of
the sounds
you want
to hear

The world is full of sounds we don't want to miss – voices, laughter or a skateboarder on the sidewalk.

ReSound technologies take full advantage of your brain's natural ability to hear and focus on what's important to you. ReSound LiNX 3D hearing aids deliver top-rated quality and clear speech understanding to provide you with a more vivid awareness of your sound environment.

Spatial Sense gives you a clear and natural sense of the sounds around you by emulating the way the outer ear channels sound to your inner ear. This supports

your ability to detect where sounds are coming from so you can experience a more natural sense of your surroundings - with the highest possible sound quality.

Binaural Directionality III makes sure you can focus on what you want without being cut off from your surroundings. Binaural Directionality III increases your environmental awareness to help you focus in on the sounds you want to hear. This supports your natural ability to focus on speech, even in the noisiest situations.

ReSound Smart 3D™ app

Enhance your hearing experience

Personalize your
hearing experience to
get the most out of your
hearing aids with the new
ReSound Smart 3D app.

Everything you need for a quick adjustment is on the main screen for one-tap access. So you'll always be confident with your hearing aids and ready to engage with the world around you.

The app can also provide you with advice about your hearing aids - just when you need it. It can offer you tips for optimizing your hearing in any given situation and even be used to track the location of your hearing aids when you can't find them.

Sound controls
available on
Apple Watch®

Always discreet and reliable

ReSound LiNX 3D hearing aids are so discreet you'll have to take them off to show them off. And they're so comfortable, you might even forget you're wearing them.

Every component – inside and out – is coated with iSolate nanotech to protect them against dirt, moisture and debris.

Wireless accessories

ReSound has an entire portfolio of wireless accessories that work together as an intelligent system to help extend your hearing over a distance and in noisy environments. For example, the TV mutes when you receive a phone call and the sound returns automatically when you hang up.

ReSound Micro Mic and Multi Mic

sits on the table or is clipped onto a person's clothing to stream sound directly to your hearing aids to improve hearing in noisy situations.

ReSound Phone Clip+

gives you more freedom, comfort and control while streaming phone calls, music or sound from your Bluetooth-enabled phone.

ReSound TV Streamer 2

streams stereo sound directly to your hearing aids, so you can listen at the volume that is comfortable for you.
